# A Complete Door System

**1 Frame Options**  
We can help you choose the right frame for your doorsystem.

**2 Removable Weatherstrip**  
Resilient design compresses when closed and springs back when open, protected by a durable jacket, for long-lasting sealing power.

**3 Hardware**  
Choose from beautiful options that will complement the look of your home and help bring you security and peace of mind.

**4 Ball-Bearing Hinges**  
Hinges with ball bearings protecting each hinge pivot, or "knuckle", offer added support and stability to keep your door opening and closing smoothly.

**5 7-Shape Corner Seal Pads**  
(Inswing Only) This innovative design creates a protective air pocket that helps prevent a vacuum from wicking moisture up the weatherstrip.

**6 Composite Adjustable Sills**  
Inswing and outswing composite sills resist rotting and insects. Inswing adjustable sills help to maintain a tight seal overtime.

**7 Dual-Bulb/ Dual-Fin Bottom Sweeps**  
(Inswing Only) Two bulbs compress to sit tight against the sill, while two fins act like walls to form barriers and a built-in rain deflector pushes moisture away.

**8 Security StrikePlate**  
Enhances the door jamb's strength and resistance against forcedentry.

# Door Construction

Therma-Tru® fiberglass doors offer the authentic look of wood. It's virtually impossible to tell the difference. But the beauty goes beyond skin deep. We combine craftsmanship and innovation to build our doors for long-lasting energy efficiency, durability and security.

## Classic-Craft® Premium Entryways

### 1 Enhanced Weather Resistance

No more worries about rotting, warping or twisting. Classic-Craft premium entryways are tested and designed to resist extreme weather conditions and the damaging effects of moisture. Both the top and bottom of the door are protected by composite rails for a longer-lasting entryway.

### 2 Solid Security

Classic-Craft premium entryways feel solid and close with authority. A 4-1/8" wide beam of engineered lumber runs from the top to the bottom of the locking side of the door to add mass and rigidity, giving the door weight and a natural wood feel.

### 3 Excellent Durability

Built to stand up to the elements and years of wear, Classic-Craft's fiberglass skins are thicker than other standard fiberglass doors to provide added durability and better long-term performance.

### 4 Higher R-Values

Classic-Craft premium entryways contribute to an energy-efficient home. A polyurethane foam core provides up to four times the insulating R-Value of wood.\*

### 5 Edge-to-Edge Moisture Protection

Resist moisture at every turn – and along every edge. Classic-Craft premium entryways have hardwood and composite edges that help prevent moisture penetration.

# Door Construction

## Fiber-Classic® & Smooth-Star® Doors

### 1 Weather Resistance

Composite rails protect the door at the top and bottom edges to help block moisture that can wick into doors.

### 2 Security

An enhanced lock block combined with 1-1/4" engineered lumber lock stiles increase rigidity and stability.

### 3 Durability

With very little maintenance, a fiberglass door can bring a home years of durability. Unlike wood, fiberglass will not warp or rot. And, unlike steel, it will not dent or rust.

### 4 R-Values

Built with a polyurethane foam core that offers up to four times the insulating R-Value of wood\*, Therma-Tru fiberglass doors insulate against cold and heat for exceptional energy efficiency.

# Classic-Craft Collections

## Classic-Craft® Premium Entryways

Here's a premium entryway that can truly express your personal style. Whether Rustic, Classic or Contemporary, you'll find a Classic-Craft premium entryway that fits beautifully with your personal style and home.

American Style Collection™

Rustic Collection™

Both Classic-Craft and Fiber-Classic are rated a *Consumers Digest* Best Buy in the fiberglass entry doors category.

### The look of real wood.

Realistic wood grains that are virtually indistinguishable from high-grade wood doors, thanks to Therma-Tru's AccuGrain® technology.

### Details that define a custom door.

Crisp, handcrafted elegance creates embossments that are deeper than standard fiberglass doors.

\*Compared to other standard fiberglass doors.

Oak Collection™

Canvas Collection.

# Fiber-Classic & Smooth Star Collections

## Fiber-Classic® Doors

Get the look and feel of rich Mahogany or warm Oak with excellent performance and value.

Both Classic-Craft and Fiber-Classic are rated a *Consumers Digest* Best Buy in the fiberglass entry doors category.

## Smooth-Star® Doors

Get a smooth, ready-to-paint surface with plenty of color options for exceptional performance and value.

# Multi-Point Locking System and Hardware

## Multi-Point Locking Systems

Engages the door and frame at three critical points from top to bottom for enhanced stability compared to traditional deadbolt assemblies.

Featuring premium stainless steel construction that resists corrosion.

(Highly recommended for 8'0" and double fiberglass doors. Not recommended for steel doors.)

**Tongue**  
(For single door systems)

**Shootbolt**  
(For double door systems)
